

6141 Curriculum Development and Evaluation

The Governing Board desires to provide a research-based, sequential curriculum which promotes high levels of student achievement and emphasizes the development of basic skills, problem solving, and decision making. Upon recommendation of the Superintendent or designee, the Board shall adopt a written district curriculum which describes, for each subject area and grade level, the content objectives which are to be taught in all district schools.

The district's curriculum shall be aligned with the district's vision and goals for student learning, Board policies, academic content standards, state curriculum frameworks, state and district assessments, graduation requirements, school and district improvement plans, and, when necessary, related legal requirements.

The Board considers curriculum improvement to be a top priority for the district. Curriculum development and evaluation will, therefore, be an ongoing process in the district, routinely supported by planned allocations of resources and staff time.

The Superintendent or designee shall establish procedures which ensure that the curriculum development and evaluation process includes input from teachers, administrators, students and parents/guardians from all grade levels, disciplines, schools, special programs and categories of students. The selection and evaluation of instructional materials shall be coordinated with the curriculum development and evaluation process.

The Superintendent or designee shall keep the Board informed about student interest and achievement in each area of the curriculum. The Superintendent or designee also shall facilitate the Board's efforts to discuss its findings with district staff and students before adopting the district curriculum.

Board Approved:

October 16, 2008

August 19, 2004

Effective Date: August 19, 2004
