

Parent Portal Information Guide

A **Parent Portal** is automatically created once a parent email is entered into Aeries.

A simple option for parents to access the Portal is by entering their email and clicking **Forgot Password?**

Employees and parents may access **AERIES ONLINE DEMOS** to access an interactive demo of the Parent Portal.

Visit:

<http://www.aeries.com/products/online-demos>

Parents can view the AERIES ONLINE DEMOS in different languages (drop down menu at the top right).

Parents must review and provide confirmation/authorization when they first attempt to access the Portal.

Confirm and Continue must be clicked in order to move on to the next section.

After Sections 1-6 have been confirmed, **Submit Final Confirmation** must be clicked to complete the process.

Parents have access to all their children's grades and information through their Portal. They can view each child's information by clicking on **Change Student** (menu at the top right of the home screen).

As long as the parent email in the Aeries system is the same for all students, a separate account/login is not necessary.
